PROFESSIONAL SUMMARY

Full-stack software developer and AI specialist, **specializing in Laravel**, with **8+ years of experience** building scalable web applications with **Laravel, Vue.js, React.js, Inertia.js and the MERN stack**. Proven track record progressing from junior to senior developer, delivering scalable backend architectures and responsive front-end interfaces. Experienced in **AI chatbots, RAG pipelines, Python (FastAPI) and vector databases such as Pinecone**, as well as SaaS platforms, REST APIs and performance optimization. Seeking a full-stack or backend-focused role in the **Gulf region or Europe**.

TECHNICAL SKILLS

- **Backend:** Laravel, PHP, Node.js, Express.js
- **Frontend:** Vue.js, Nuxt.js, React.js, Inertia.js
- **Languages:** PHP, JavaScript (ES6+), Python
- **Databases:** MySQL, MongoDB, Redis
- **APIs:** REST, GraphQL, Webhooks
- **Integrations:** CRM, DMS, Payment Gateways
- **AI:** Chatbots, RAG Pipelines, LLM Integration
- **Vector DBs:** Pinecone, Vector Search
- **Python:** FastAPI Microservices
- **UI:** Tailwind CSS, Responsive Design
- **Cloud & DevOps:** AWS, Docker, cPanel, SSL
- **Version Control:** Git, GitHub

PROFESSIONAL EXPERIENCE

Senior Laravel Developer **2024 - 2026**
CodeWire Solutions Ltd.

- **Digital Dealership System** — Lead Developer for a USA-based automotive dealership management and performance analytics platform. Built and maintained DMS and third-party API integrations, real-time dealership data processing and synchronization, and AI-powered features. Delivered dashboards, KPIs, reports, leaderboards, inventory management, sales performance tracking and digital dealership displays for dealerships across the USA.
- **CoolBuffs** — a recruitment platform connecting job seekers and employers through job listings, company profiles and career content. Developed a custom RAG-powered AI chatbot microservice in Python (FastAPI) that uses vector search over platform content to give accurate, context-aware answers to candidates and employers. Integrated it with the Laravel and Vue.js application, using Redis caching for fast responses.
- **ChefsHub** — a chef and supplier marketplace where chefs discover, compare and order from suppliers. Built a single Laravel 11 + Sanctum API backend powering the public website, admin panels, a Nuxt.js dashboard and a native Flutter mobile app, with token-based authentication, role-based access for chefs, suppliers and admins, and shared REST endpoints for all apps.
- Led development of full-stack web apps using Laravel, Vue.js, React.js and Tailwind CSS.
- Owned architecture and technical decisions for client projects, mentoring junior team members.
- Built e-commerce solutions with custom product personalization and third-party integrations.
- Delivered AI chatbot integrations and Laravel performance optimization for international clients.
- Worked on multiple other client projects, providing development, maintenance, deployment and technical support services.

Software Engineer **2021 - 2024**
Intelliscence

- **Project360** — an enterprise platform combining project management, time tracking and financial analytics for professional services firms. Built features including a hierarchical work breakdown structure, Gantt charts, calendar-based time entry, and expense management with receipt uploads and approval workflows. Delivered profitability dashboards, drill-down reports with Excel export, real-time team messaging and multi-organization role-based access.
- **XStream Gym** — a full-stack fitness platform connecting certified trainers with members through live-streamed and on-demand workout classes. Developed with Laravel and Inertia.js, featuring role-based dashboards for trainers and members, class scheduling and booking, live-session streaming, and a searchable on-demand workout library. Implemented secure authentication, subscription-based access control, and a responsive single-page interface.
- Developed and maintained full-stack features using Laravel, Vue.js, React and JavaScript.
- Built backend services and APIs with Python (FastAPI) for cross-platform applications.
- Contributed to multiple other client projects, delivering new features, bug fixes, API integrations and ongoing support.

Junior Developer — Laravel / Vue.js / React.js **2017 - 2021**
Bluehorntech

- **CareOX v2** — a multi-tenant warehouse and order-fulfillment ERP that brings inventory, orders, CRM and a full finance suite into one platform. Integrated external sales marketplaces for automatic order syncing and stock updates across channels. Built with Laravel, Inertia.js and Vue.js, using tenant-isolated data, modular business workflows and a Docker-based setup for consistent deployment.
- Started career building web applications with Laravel, Vue.js and React.js, progressing to independently owning full-stack feature development.
- Worked on multiple other client websites and web applications, handling development, customization and maintenance.

EDUCATION

Bachelor of Science in Software Engineering (BSSE) **2013 - 2017**
COMSATS University Islamabad

CERTIFICATIONS & LANGUAGES

- **IELTS** — British Council (2024)
- **English Language Communication Certification** — TEVTA Board, Lahore (2013)
- **Languages:** English (Fluent)

TARGET POSITIONS

- Senior Full-Stack Developer
- Senior Laravel / PHP Developer
- Backend Developer (Laravel / Node.js)
- AI Integration Developer (Chatbots & RAG)
- Full-Stack Developer (Vue.js / React.js)
